

Sticky Step Textile

Sticky Step Textile is a heavy duty step on, step off contamination control mat which has been designed to capture large amounts of dust and dirt from entering controlled working environments. The mat is constructed of 36 resin impregnated woven cotton layers which sit securely within a heavy-duty plastic frame. Each layer is coated with a non-transferable resin that ensures any loose particles on the surface and within the tread of footwear following being walked on, will detach and remain in the resin on the mat. Once soiled, each layer can simply be peeled away and disposed of to reveal a new clean layer below. Sticky Step Textile is the perfect solution for paint shops, construction, off shore, nuclear, electronic industries and many other environments where contamination control is essential.

Features

- ◆ **Typical applications:** Ideal for paint shops, construction, off shore, nuclear, electronic industries and many other environments where contamination control is essential.
- ◆ **Material:** Resin impregnated cotton layered sheets with plastic surround.
- ◆ **Cleaning:** Simply peel off the top layer to reveal a clean layer below.
- ◆ **Warranty:** Lifetime.
