

# Forklift Mat

Forklift Mat provides optimal water absorption and effectively remove dirt brought into warehouses by forklift trucks. The polypropylene surface has been specially designed with an intricate weave to achieve maximum effectiveness in high traffic areas. Affixed using our double-sided adhesive tape, our Forklift Mat is suitable for the most demanding warehouse environments, reducing the risks of slips, trips, and falls.

The mat comes in a 90cm x 180cm tile and is designed to be able to cover large areas by laying them side by side. Adhesive tape sold separately.

## Features

- ◆ **Typical applications:** Ideal for any environment where forklifts are operated, contributing to cleanliness, safety, and the protection of floor surfaces.
- ◆ **Material:** Polypropylene surface with rubber backing.
- ◆ **Cleaning:** Wash with cold water, use a vacuum cleaner, or a pressure pump to remove dirt. The use of detergents is not recommended.
- ◆ **Warranty:** Lifetime. However, the longevity of the mat depends on how they are treated. We recommend that forklift operatives refrain from turning on the mats or placing/pushing pallets across them, as such actions can cause damage, resulting in early replacement.

Charcoal only

Suitable for indoor use
